

IDEA **INTERCOACH** LUGGAGE RACK & AIR CHANNEL SYSTEM

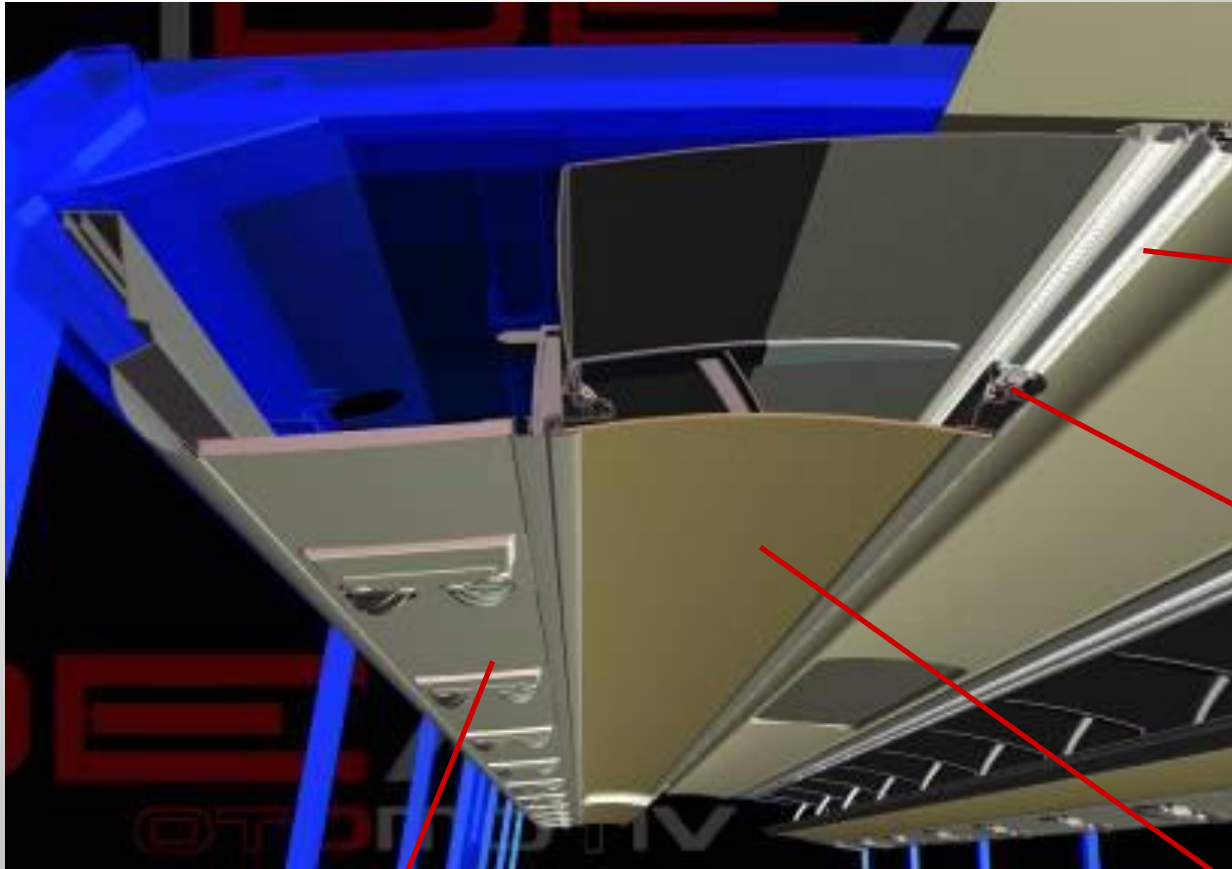

### Application of the System to Different Sections

Our system is applicable into different sections of intercity vehicles and coaches.

COACH Version:

LED Light Channel  
on the ceiling

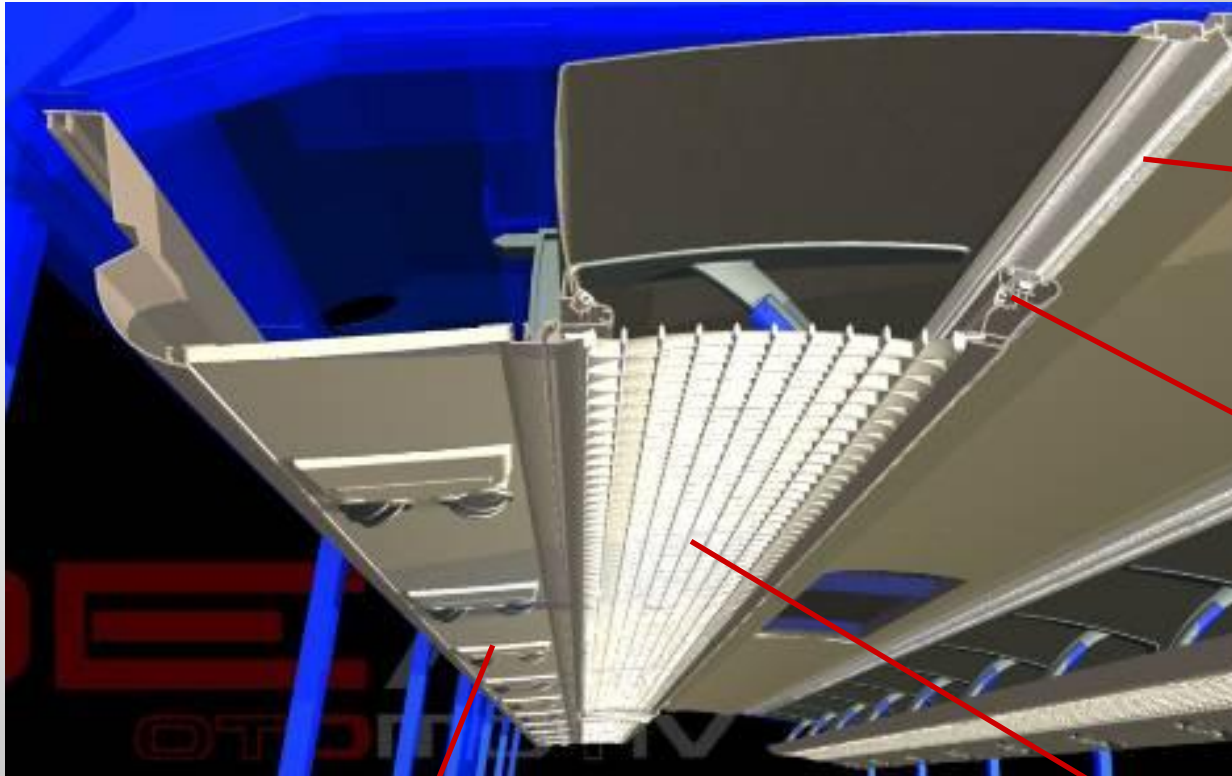

LED Light Channel in  
the handrail

Service Sets &  
Spacers for the  
COACH Version.

Fabric upholstery  
under the luggage  
rack for the COACH  
Version.

INTERCITY Version:

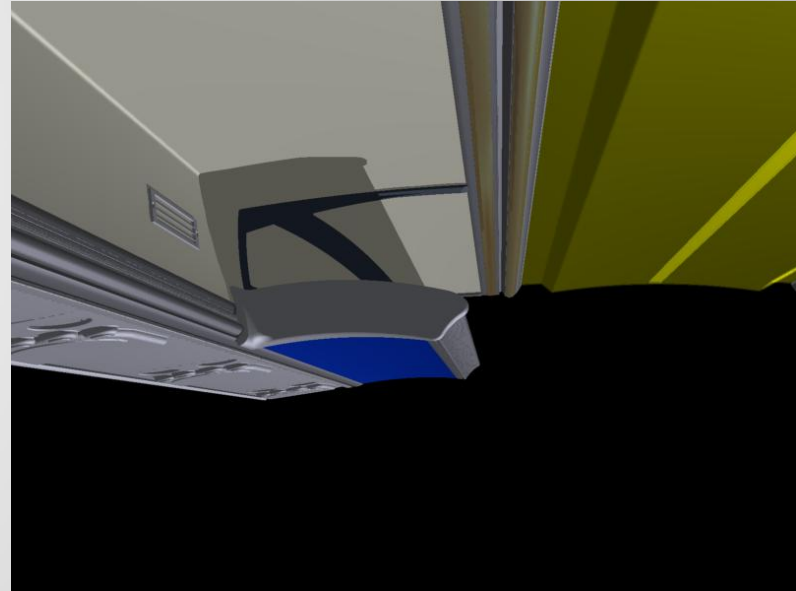

LED Light Channel  
on the ceiling

LED Light Channel in  
the handrail

Service Sets &  
Spacers for the  
INTERCITY Version.

Perforated Luggage  
Rack for the  
INTERCITY Version.

#### OVERDOOR SOLUTION

The luggage rack is interrupted via soft plastic caps for the over door areas; where the air channel continues w/o interruption.

Soft Plastic Luggage  
Rack Cap

Different Types of Service Set Options

IDEA Service Set for Coach Version

OVAL Service Set for Coach Version

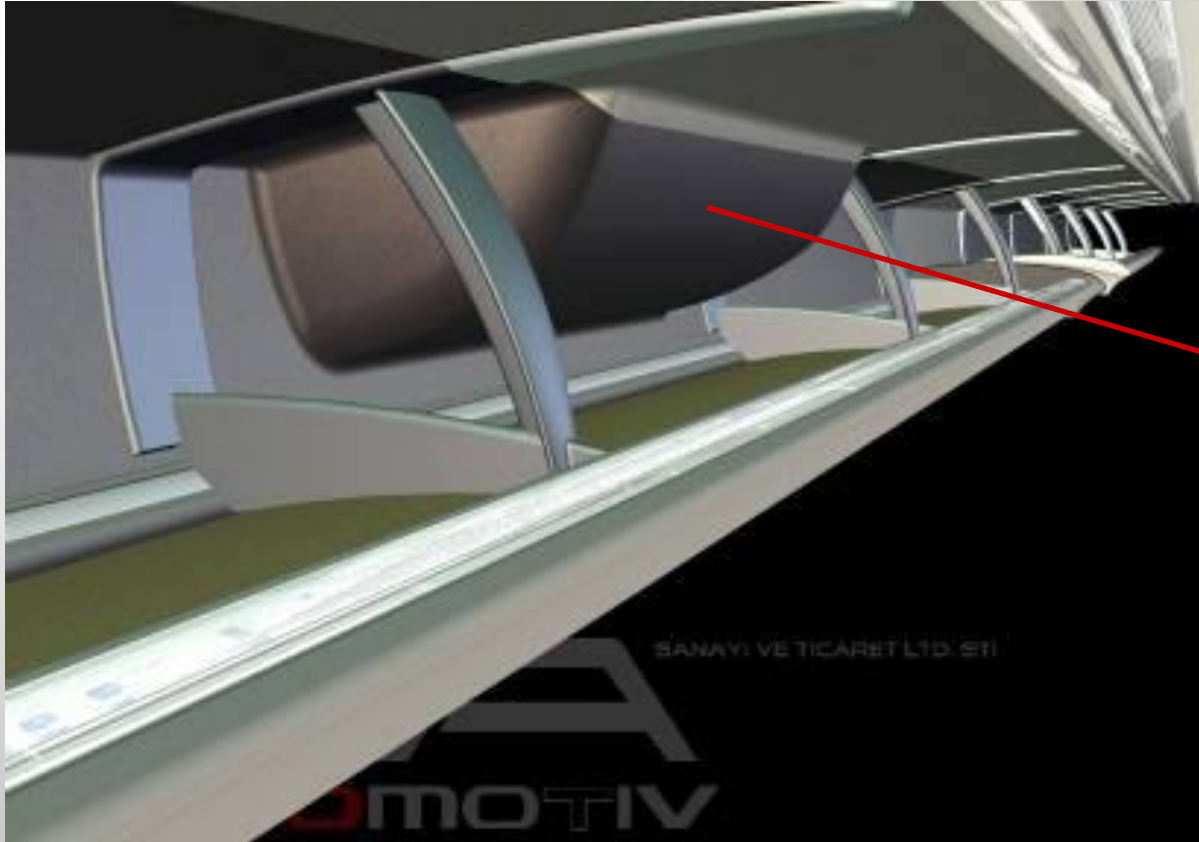

Individual SS for Intercity Version

UNIVERSAL Service Set for Intercity Version

**A/C Connection:**

**Air Diverter for the  
AC Unit Connection**

Connection to the AC System should be checked & discussed on the vehicle. As we do not have the complete 3D data of the vehicle; we cannot prepare the 100% solution yet. An Air Diverter of ABS Vacuum Thermoformed can be needed according to the position of the AC air inlet.

### Flap for Driver/Hostess

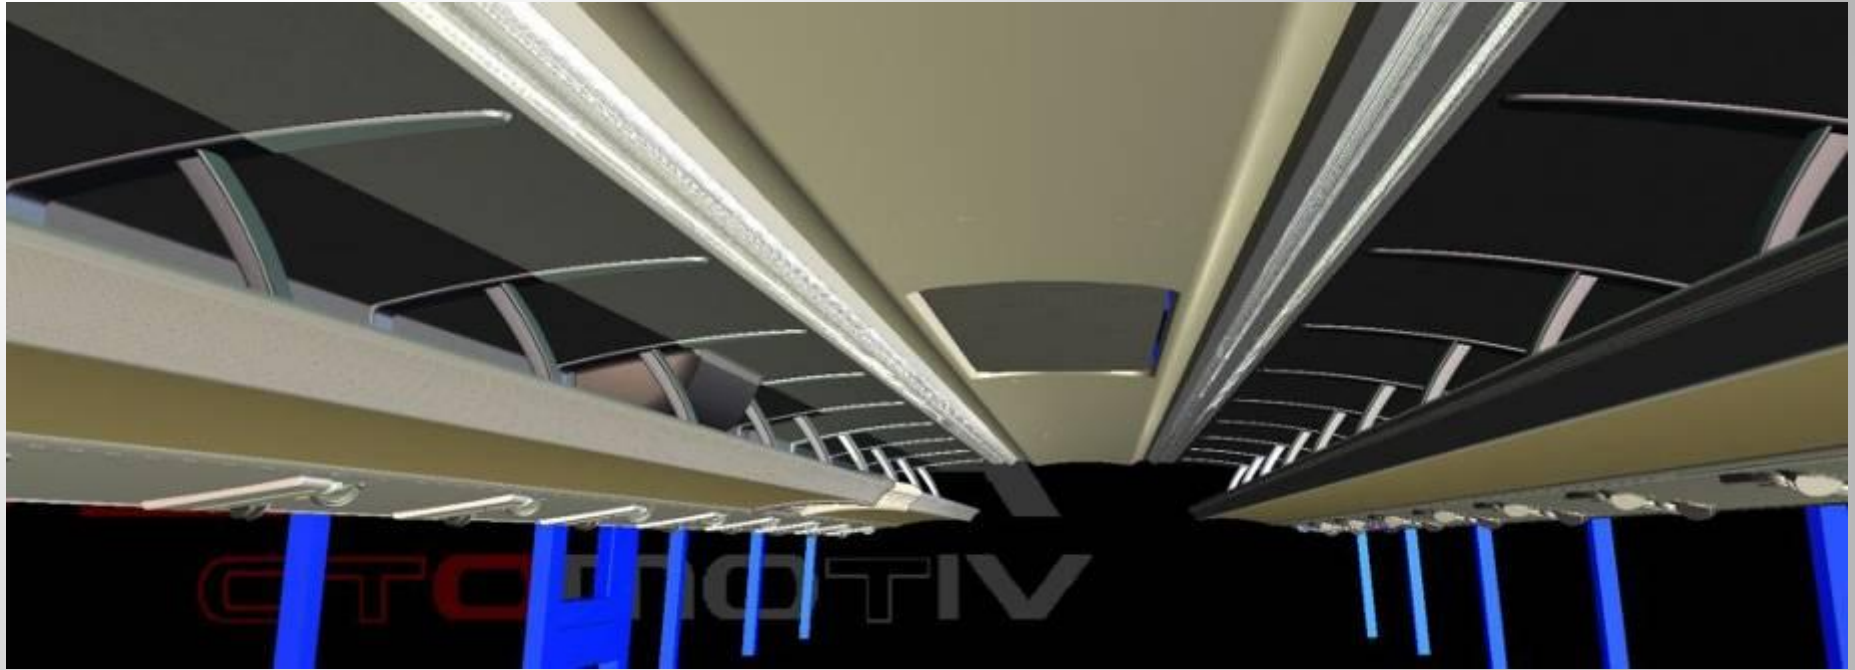

### FLAP SOLUTION For The Driver & Hostess

We also have the ready solution for the flap area to be used by the driver and the hostess. The ABS vacuum thermoformed flap has the cylinder lock and the interior of the flap area is moquette upholstered.

**Moquette  
upholstery inside  
the complete  
luggage rack**

**Air Diffusers inside  
the luggage rack are  
available upon  
request.**

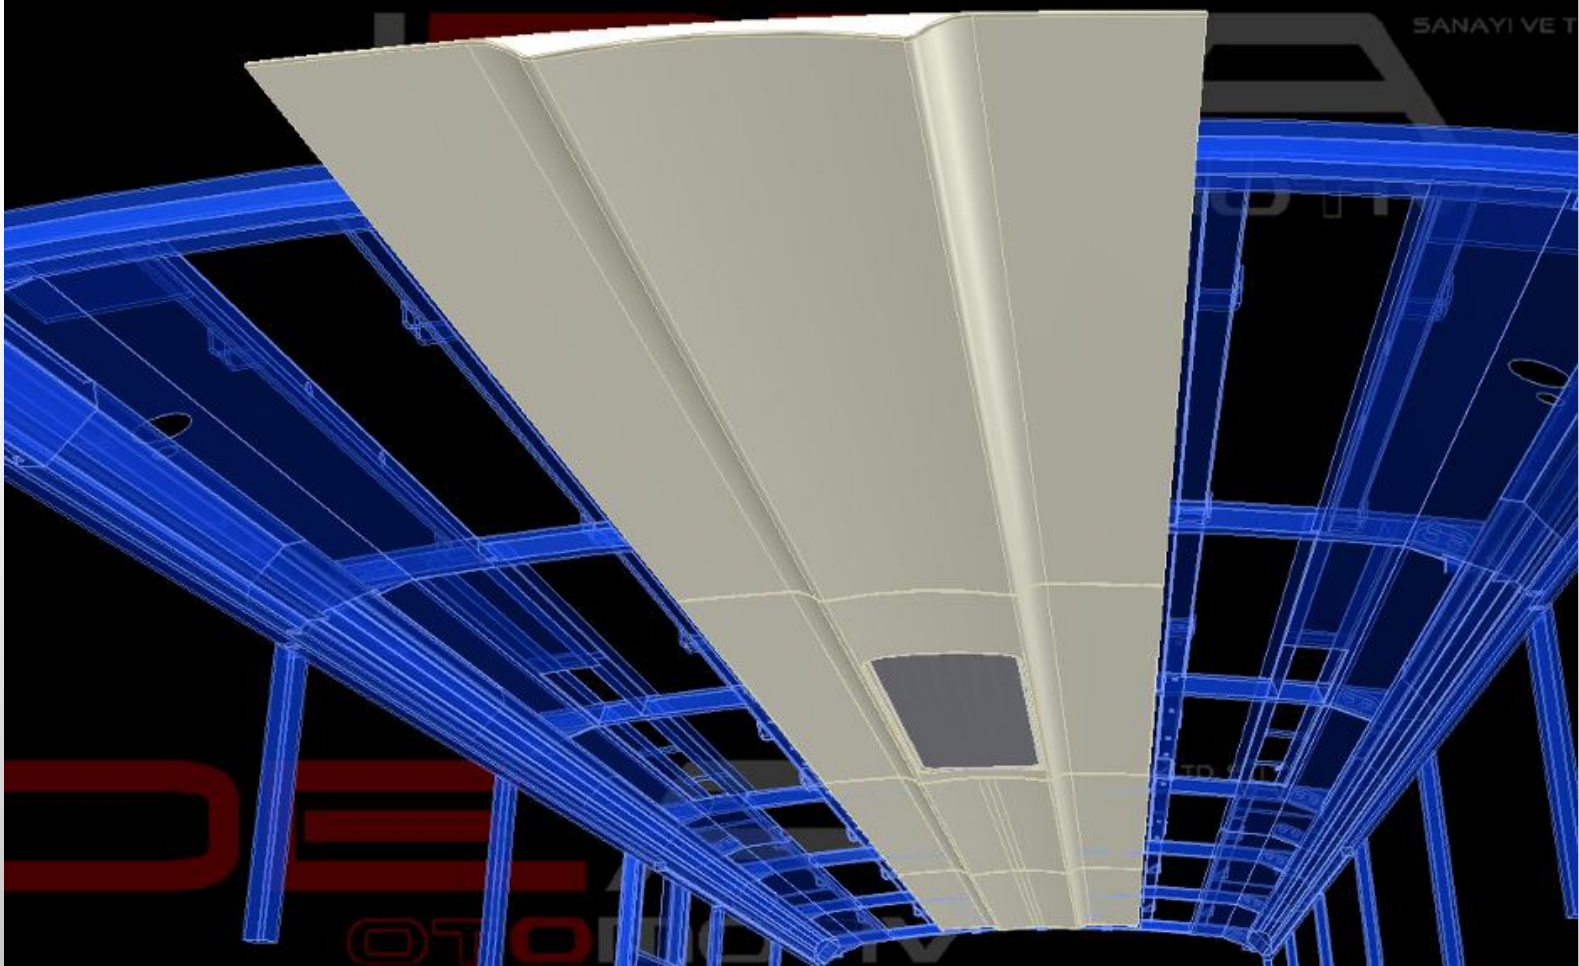

The Air Channel is completely open able for the Service/Maintenance Purposes via the special hinge system.
